Forgot your [username](#) or [password](#)?

Open the Connected Health App and log in with your user name and password. If you do not have an account, click 'Register here' and create an account.

Note: If you have already created an account at www.clouddx.com, please use that username and password. Alternatively, your health care provider may have given you login information or there may be an information card enclosed in your Connected Health Kit. If you do not have a user name and password, please contact Support.

Press 'Take a Reading' and follow the on-screen instructions to take a Pulsewave reading.

(Please refer to Section 4 and Section 5 for further instructions on positioning.)

Please note your screen may look different depending on your subscription.

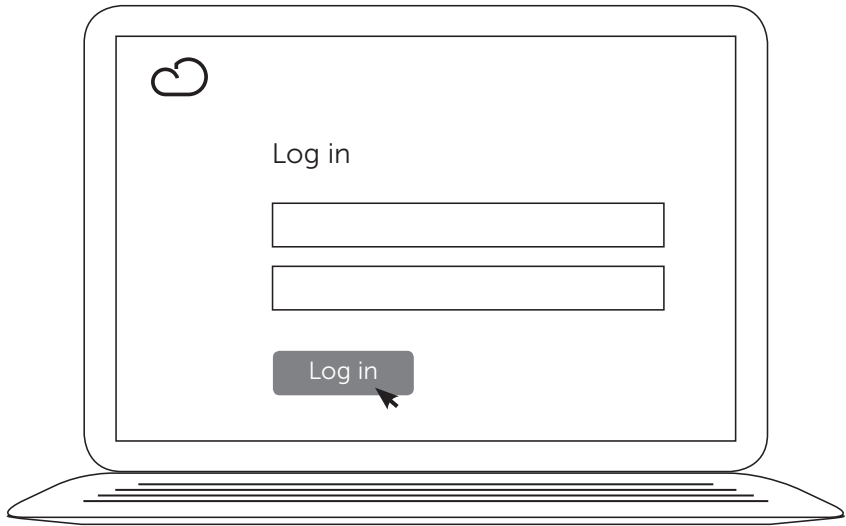

3. Connecting to a Laptop or Computer

Connect USB cable to your computer.

Connect USB cable to the Pulsewave® device.

Visit pulsewavedx.com and log in with your user name and password.

Note: If you have already created an account at www.clouddx.com, please use that username and password. Alternatively, your health care provider may have given you login information or there may be an information card enclosed in your Connected Health Kit. If you do not have a user name and password, please contact Support.

If this is your first time using the Pulsewave on your laptop you will need to download the Pulsewave software. Click on 'Downloads' and follow the on-screen instructions to install the required software.

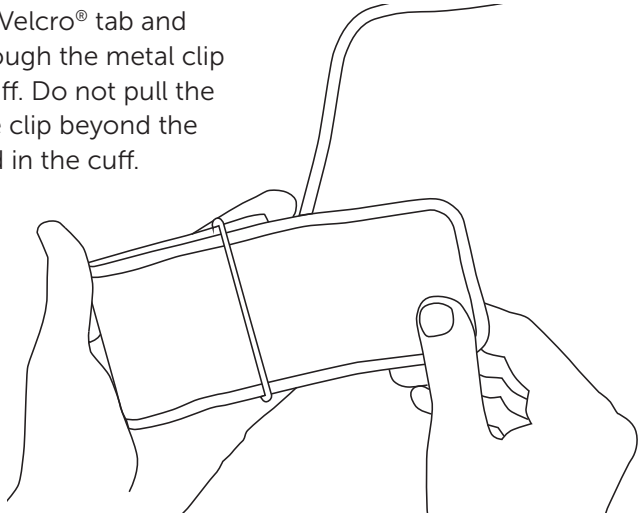

Take a reading by pressing the 'Start' button and follow the on-screen instructions.

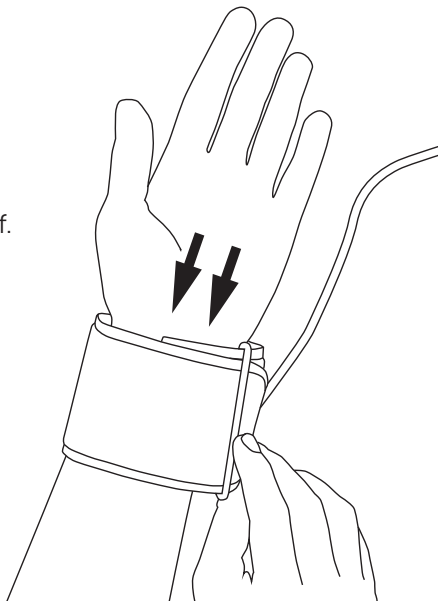

(Please refer to Section 4 and Section 5 for further instructions on positioning)

4. Cuff Positioning Guide

Open the cuff's Velcro® tab and pull the flap through the metal clip to loosen the cuff. Do not pull the cuff through the clip beyond the stopper installed in the cuff.

Remove any jewelry and roll up shirt sleeves. If possible, always place the cuff on your left wrist. Insert your hand through the cuff.

Pull the flap through the metal clip to tighten the cuff.

Bend the flap. Make sure the cuff is attached comfortably to your wrist. It should be snug, neither too tight nor too loose.

The inflatable cuff can be inverted or rotated as presented here for optimal comfort.

5. Standard Positioning Guide

Before the reading:

- Do not eat, smoke, or exercise 30 minutes prior to taking a reading
- Sit upright in a chair
- Put your feet flat on the floor
- Do not cross your arms or legs
- Clear your mind and relax for 5-10 minutes prior to taking a reading
- Put the cuff against bare skin
- Remove any jewelry, e.g. bracelets or watches
- Do not drink coffee, tea or cola (any drink containing caffeine) in the 30 min prior
- Empty your bladder or bowel
- Do not measure your blood pressure if you are upset or in pain

During the reading:

- Keep your left arm on the table so that your wrist is at heart level
- Do not talk
- Do not move

Things to know

- Intended for use only by adults (18 years or older)
- Not intended to replace regular medical examination
- Do not adjust your medication, diet or lifestyle without first consulting a physician
- Do not use the cuff on broken skin, such as cuts, scrapes or open wounds

Conditions that may adversely affect use

- Mechanical vibrations
- Incorrect positioning of the cuff (e.g. placed too far up from the wrist, too loose or too tight)
- Wrist not aligned at heart level
- Any movement, including talking, during the reading
- Certain physiological conditions (such as arrhythmia, and pregnancy)

Support

Cloud DX maintains a convenient support web interface that includes an extensive knowledge base, describing all of the functions of Cloud DX Connected Health devices. Please explore the knowledge base here:
